Career Profile:

I am a second-year Computer Science student at Technological University of Dublin, passionate about exploring new technologies and expanding my skill set beyond the classroom. Alongside academic pursuits, I co-founded and actively manage a Discord server tailored for students, fostering a supportive community for both study and relaxation. I thrive in collaborative environments and am dedicated to continuous learning, currently focused on mastering Java and exploring Python as a hobby. With a commitment to excellence and innovation, I am eager to contribute to impactful projects and advance my career in software development.

Aspiring Software Engineer/Web Developer/Full Stack Developer/Data Analyst/Linux Engineer, currently pursuing a degree in Computer Science at Technological University of Dublin (TUD), eager to contribute technical skills and enthusiasm to innovative projects in the field of technology. Have developed strong communication, interpersonal and leadership skills having led a team of 4 people and presented two final year projects on time and to a high standard to the academic board.

Through my college work, projects, and community engagement, I've attained a robust understanding of SQL, database management, and Java programming. This expertise extends to LAN/WAN technologies, software engineering, and IT business management, equipping me to excel in various business, finance, and IT contexts.

I'm currently learning family's language (Igbo & Benin) these two separate languages but I'm not fluent but i strive to be.
